BLOCK HEATER CORD 15FT 16/3AWG

15ft 16/3 SJTW -50°C Glacier Flex® Blue 3-Outlet Engine Block Heater Cord w/Flashing Primelight® Power Indicator Light Glacier Flex® extreme cold weather extension cords provide outstanding performance in extreme climate conditions at temperatures from -58°F up to +140°F (-50°C up to +60°C). Glacier Flex® cords provide superior resistance to moisture, ozone, cracking, and are outstanding in resistance to abuse, rough handling and wear. The exclusive Primelight® flashing power indicator light connector rapidly changes from a red light to a blue light so that you can see that there is power through the cord to the engine block heater, even if the 3-outlet tap is under the hood.
